Beallsville, Ohio.-"I wish all nerrous, weak, run-down women could have Vinol. I was so run-down, weak companies and shipper, but the general partial property in the general partial partial property in the general partial and nervous I could not sleep. Every-

In the Journal of the American Medical Association (July 27, 1912, Page 2805). Br. C. F. Disen, of Minneapolis, holds that a "deficiency of calcium" (lime) is responsible for the physical conditions which lead to tuberculosis, "and the therapy he advorates rests on this basis."

One of the reasons for the wide-spread success of Eckman's Alterative in the treatment of tuberculosis is its ability to supply this deficiency. It contains a line sait in such combination with other valuable agents as to be easily assimilated by the average person. Many cases seem to have yielided to it.

We make no exaggerated claims for it, but prefer that it be tried on the same hasis as any other prescription, and since it contains so opiates, narcotics or habit-forming drugs, it is safe. From your drugsist or direct.

Eckman Laboratory, Philadelphia.

Ike Pryor Hopes to See Day When Every City Will Have Killing Plant.

Col. Ike Pryor urged every defectate to go back home and lusist that his city instal municipal abattoirs. He said he hoped to see the establishment of municipal abattoirs in every city of the country. His address was made Wednesday before the convention.

The burden of Col. Pryor's address was the advantage to be gained by livestock producers, as well as by consumers of meats, through the establishment of municipal abattoirs to take the place of the large packing plants, at least se far as supplying meats for local densumption might be concerned. He urged the delegates to the convention to use every housest endeavor possible to have the governments of the principal cities of the United States pass ordinances providing for the erection of slaughter houses to be conducted under municipal control and making it obligatory that all animals intended for claughter he inspected on the hoof and again on the hook by duly author-Col. The Pryor urged every delegate OF EXPLOSIVES ON FEB. 3 As illustrated tecture on the "Sufo Transportation of Explosives and Other Dungerous Arthrice" will be given by Col. James L. Tarior, amietant to the chief inspector of the layers of explosives of the American Ending No Pales, at 8 p. m. Thursday, February 5. The lectures are intended primarily for the benefit of employee of transportation companies and shippers, but the general public is invited. No admission is charged,

ized and clearly competent inspectors, before being offered for sale as food.

Prevent Combinations.

"The establishment of municipal abatroirs," said Col. Proyr. "beade providing for sanitary means, will make impressible a combination of individuals having for its object the manipulation or control of the privilege of providing meat foods for such cities as have municipal abatroirs, and make it impossible also for a combination against liventock producers in the vicinity in which the city or town is located in the matter of prices.

Urge System.

Twomid suggest that this association adopt a resolution urging each state organization represented at this convention take this matter up in their respective states and to make a vigorous and systematic effort to bring all the principal cities of their respective states to realize the importance of a system of minicipal abstroirs with staid local inspection. Urme System,

Stimulate Livestock Industry, Stimulate Livestock Indusery.

Such a system will encourage and alimulate the livestock producers of this country to a point where they will feel sure they have a voice in the disposition of the products of their farms and ranches, so far as prices are concerned. It will increase very materially the number of livestock markels in the United States and will lessen the opportunity for any individual, firm or corporation to dictate, on the one hand, what the feeder shall receive for his product and on the other hand, what the consumer must pay for his beef, pork or matton. This should not necessarily increase the price to the consumer, but would give full sway to the natural operation of the law of supply and demand.

Xo Pight on Packers.

No Fight on Packers.

"I have no special fight to make on the packers. They are a necessity and to climinate them would be a step hashward. There is business ecough along the line of supulving meat products for the world to furnish occupation for the great packing houses, as well as for the municipal abartoirs I hope to see established in every city throughout this country."

FACE AND HANDS

Became Solid Eruption. Did Not Dare to Wash Hands. Face Was Awfully Disfigured.

HEALED BY CUTICURA SOAP AND OINTMENT

"When I was in ill health my impure blood caused my face to break out, and also my bands. The general appearant a of the breaking out was small blisters accompanied by itching. I could not rest day or night for a good while and the scratching of my skin made the blisters become a solid eruption. I was told it was exsema and I did not dare to wash my hands or face for every time I did it, it seemed to get worse. My face was awfully disfigured.

"It lasted three months and I used -Salve, and other remedies but they did not amount to much. I was told to use Cutisura Scap and Cintment and I did so. I used them according to directions and new I am completely healed." (Signed) Mrs. Estella Cooke, 525 6th Ave., Columbus. Ga., July 30, 1915.
